Professional Summary

Software Engineer with 1+ year of experience in automation engineering and backend development. Strong expertise in JavaScript, Node.js, REST API development, and containerized environments using Docker and CI/CD pipelines.

Experienced in building scalable backend services, improving code efficiency, and ensuring system stability through structured development practices. Passionate about designing maintainable systems and contributing to product-oriented engineering teams.

Professional Experience

- **Python Automation Engineer**
- DURU Corporation (Client: LG Soft India)
  May 2025 – Present

Automation Framework Development

- Designed and maintained **scalable Python-based automation frameworks** for functional and regression testing.
- Converted 100+ manual test cases into automation, significantly improving **regression coverage**.
- Developed reusable utilities using **OOP principles** to enhance maintainability and reduce duplication.
- Implemented structured logging and robust **exception handling mechanisms** for efficient debugging.

CI/CD, DevOps & Containerized Execution

- Integrated automation suites into **GitLab CI/CD pipelines** with branch-based and scheduled triggers.
- Built and maintained **Docker-based execution environments** to ensure consistency across local and CI runs.
- Implemented **Docker-in-Docker (DIND)** to support long-running and parallel automation jobs.
- Managed extended regression executions and resolved pipeline failures through **log analysis and environment debugging**.

Optimization & Quality Assurance

- Reduced automation execution time by **25–30%** through refactoring and performance optimization.
- Minimized **flaky test failures** by improving validation logic and execution stability.

- Conducted **root cause analysis** for recurring defects and improved test reliability.
- Collaborated with development teams during release cycles to ensure higher **build stability and quality assurance**.

Technical Skills

Programming: Python, JavaScript
Automation: Automation Framework Design, Test Case Automation, Regression Testing, REST API Testing
DevOps & Tools: Git, GitLab, CI/CD Pipelines, Docker, Docker-in-Docker (DIND), Linux
Backend & Database: Node.js, Express.js, MongoDB, MySQL
Soft Skills: Communication, Teamwork, Critical Thinking

Education

Degree	Institute/school	CGPA/Percentage	Year
B. Tech - IT	Sri Venkateswara College of Engineering, Tirupati	80	2020-2024
Inter - MPC	Sri Chaitanya College, Kurnool	89	2018-2020
10th – CBSE	St Joseph Public School, Anantapur	77	2017-2018

Certifications & Achievements

- Earned a 5 Star rating in Problem Solving on HackerRank
- Certification in JavaScript 2023 Udemy
- Certified in SQL in HackerRank
